

EXPERIMENT – 8

NAME: ANBUSELVAN V

ROLL NO:240701038

AIM:

The aim is to create storyboards representing the user flow for a **Healthy Meal Planner mobile app** using Balsamiq.

Procedure:

1. Tool Used: Balsamiq Wireframes (<https://balsamiq.com>)
2. Created a new project and added mobile screens to simulate the user's meal planning experience.
3. Each screen represents a key step in planning, tracking, and managing healthy meals.
4. UI components like buttons, text fields, icons, and cards were used from Balsamiq library.
5. Designed wireframes to be simple, clean, and user-friendly.

User Flow:

1. Home Screen – Users can browse healthy meals, search recipes, and view daily calorie progress.
2. Meal Details Screen – Displays ingredients, cooking time, and calories of a selected meal.
3. Planner Screen – Users can plan meals for the week by dragging and organizing meals.
4. Progress Screen – Shows calorie intake, health stats, and achievements.

Home Screen

Components:

- Search bar for healthy recipes
- Featured healthy meals section
- Categories (Breakfast, Lunch, Dinner, Snacks)
- Meal cards with image, calories, and time
- Daily calorie progress bar **Purpose:**

Acts as the starting point for discovering meals and tracking daily nutrition.

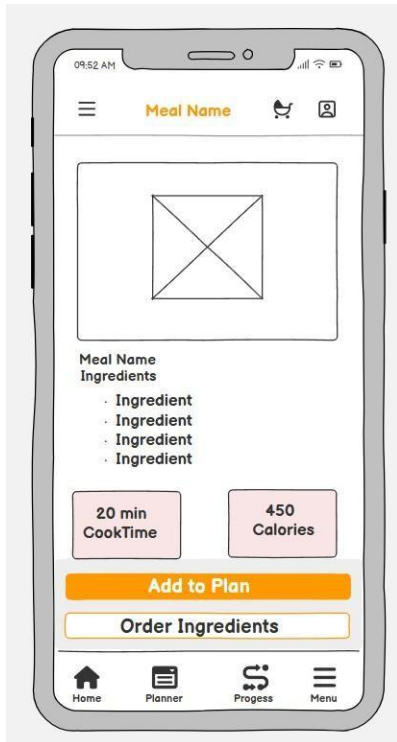

Meal Details Screen

Components:

- Meal image
- Meal name
- Ingredients list
- Cooking time
- Calorie count
- “Add to Plan” button
- “Order Ingredients” button

Purpose:

Provides complete information about a meal and allows users to add it to their plan.

Planner Screen Components:

- Weekly calendar (Mon–Sun)
- Drag-and-drop meal slots
- Daily calorie target slider
- Add meal button
- Total calorie tracker **Purpose:**

Allows users to organize and plan meals for the week efficiently.

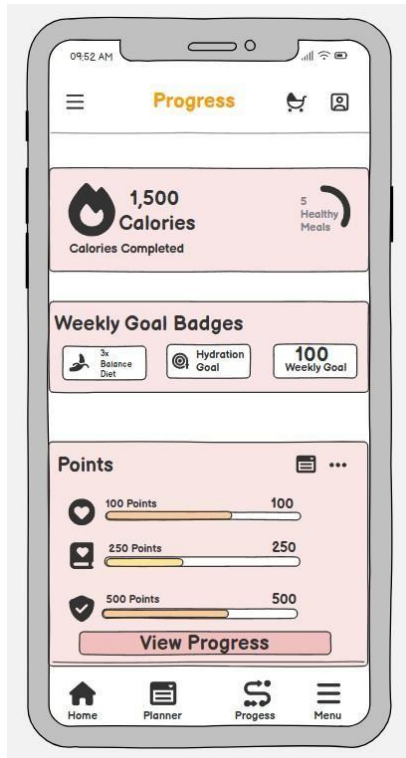

Progress Screen Components:

- Calories completed (e.g., 1500 kcal)
- Health score indicator
- Weekly goal badges (Diet, Hydration, etc.)
- Points and rewards system
- Progress bar

Purpose:

Tracks user health progress and motivates them with goals and rewards.

Final Result:

The wireframes successfully represent a **Healthy Meal Planner App**, showing how users can:

- Discover meals
- Plan weekly diet
- Track calories
- Monitor health progress
