USER INTERFACE AND DESIGN

COMAPARSION OF UI DESIGN BETWEEN TWO FIGMA CREATION

BAD WEBSITE:

GOOD WEBSITE:

PROTOTYPE LINK:

<https://www.figma.com/design/ojTKy1KvTLFP8T7yrox6fE/Untitled?node-id=0-1&t=SEIP8UXYkkEr7UZW-1>

The two websites have distinct designs and approaches. Here's a comparison:

Bad Website

Design Style:

Uses a simple layout with bright background colors and basic product images, lacking visual consistency.

Content:

Shows only product images and names with no detailed descriptions or engaging text.

Navigation:

Provides very limited navigation, making it hard to explore more options.

Purpose:

Mainly focuses on displaying products without emphasizing user experience or branding.

Good Website

Design Style:

Uses a creative and visually appealing layout with soft colors, high-quality images, and attractive typography.

Content:

Includes engaging text, flavor highlights, and visually rich elements that attract users.

Navigation:

Offers clear and simple navigation, allowing users to move easily through the website.

Purpose:

Aims to build strong brand identity and provide an enjoyable user experience.

Key Differences:

- **Focus:** The bad website is product-centric, while the good website emphasizes storytelling and branding.
- **Design Aesthetics:** The bad website uses a simple and basic design, whereas the good website is thematic and visually attractive.
- **Content Depth:** The good website provides detailed and engaging content, while the bad website focuses on minimal information.
- **Target Audience:** The bad website is mainly for quick product viewing, while the good website targets users by building brand connection and engagement.
